Club president Hank Kruyff takes off at the recent Bramalea Fun Fly.

Not all radio controlled flights are successful.

Flyin' fun

It brings new meaning to 'off we go into the wild blue yonder', but for members of the Bramalea Radio Control Flyers Inc. (BRCFI), the rush is similar.

The 75-member club operates on a daily basis at the Countryside Flying Field, for a little fun and camaraderie.

The club flies seven days a week, with winter sessions held indoors at the St. Josephine Bakhita Catholic School.

The BRCFI recently held its annual Bramalea Fun Fly with more than 80 people and 37 registered pilots taking part.

Anyone interested in learning more about the local club, or how to get started, can contact them through their website at www.brcfi.ca.

Andre Laurant of the Toronto Club works on his A-26 Invader undercarriage.
